The go-to line for the left whenever they can't answer for their corruption or want deflect to others is to claim the Russians Did It™. However, the intel agencies have had enough of the excuses it seems (from Daily Mail):

> The FBI is now in possession of Hunter Biden's laptop, senior federal officials say. Law enforcement sources told Fox News on Tuesday Biden's emails are believed to be 'authentic'. The FBI and DOJ also concurred with DNI John Ratcliffe's assessment on Monday that the files are not part of a Russian disinformation campaign. House Intel chair Adam Schiff had earlier claimed the 'smear' on Biden 'comes from the Kremlin'. Trump on Tuesday urged Bill Barr to appoint a special counsel to investigate the Bidens. It has since emerged Giuliani on Monday had also presented the files to authorities in Delaware

All those people screaming about the laptop needing to be given over to the authorities have to figure out what their new deflection will be. As it turns out, that won't be easy (from Gateway Pundit):

> Rudy Giuliani has announced that he has turned over Hunter Biden's hard drive to Delaware State Police due to pornographic photos of underage girls and inappropriate text messages.

Okay, so this is really bad if true. However, remember this is coming from Guiliani and seems to be a QAnon derived assertion. Regardless, we know Hunter has had problems with hookers, drugs and money. Let's just play it safe and say that the age of those hookers are perhaps a bit Epstein-ish.
